

Abhay Gautam

FRONTEND DEVELOPER

PROFILE

Passionate and skilled web developer specializing in crafting beautiful website using the React.js framework. With a keen eye for design and a lover for coding, I am constantly looking out for new technologies and trends in the ever-evolving market. I thrive on curiosity and find great excitement in exploring and adopting the latest tools and techniques to create engaging and dynamic web experiences.

PROJECTS

Online Meal

The purpose of this project is to automate the existing manual system by the help of computerized equipment's and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with. The Project's main purpose is to maintain track of information such as Item Category, Food, Delivery Address, Order, and Shopping Cart. It keeps track of information about the Item Category, the Customer, the Shopping Cart, and the Item Category. Only the administrator gets access to the project because it is totally built at the administrative level. The project's purpose is to develop software that will cut down on the time spent manually managing Item Category, Food, Customer, and Delivery Address. It saves the Delivery Address, Order, and Shopping Cart information.
